

# Sentinel

## Base Station Magnetometer

8.5 lbs,  
soaking wet

Explorer is the world's smallest and lightest high sensitivity magnetometer. That's a lot of punch for a mag that packs so light.

- 10 million readings storage capacity
- Download 1 million readings in less than 4 minutes
- GPS receiver provides automatic time synchronization
- Cellular network module provides remote monitoring capabilities
- Easy set up, you don't have to orient the sensor, it's entirely omnidirectional
- Pre-assembled tripod makes deployment quick and simple
- Power requirement 1W
- Battery life is 3500hrs (146 days)
